

My Vercel URL

The screenshot shows a web browser window with the address bar displaying `127.0.0.1:5500/demo/md/w07-xx-14/w07_xx.html`. The page content shows a 'Hello World' message. Below the browser, a terminal window is open, showing the command `curl http://127.0.0.1:5500` and its output: `Five Server running at: > Network: http://192.168.56.1:5500 > Network: http://163.13.10.132:5500 > Local: http://localhost:5500`.
