to replace index.html in the home directory

W14-P1: Setup mega menu

W14-P2: Show class demo of w2, w3, w6 in both local and Vercel

=> Show in local for w2

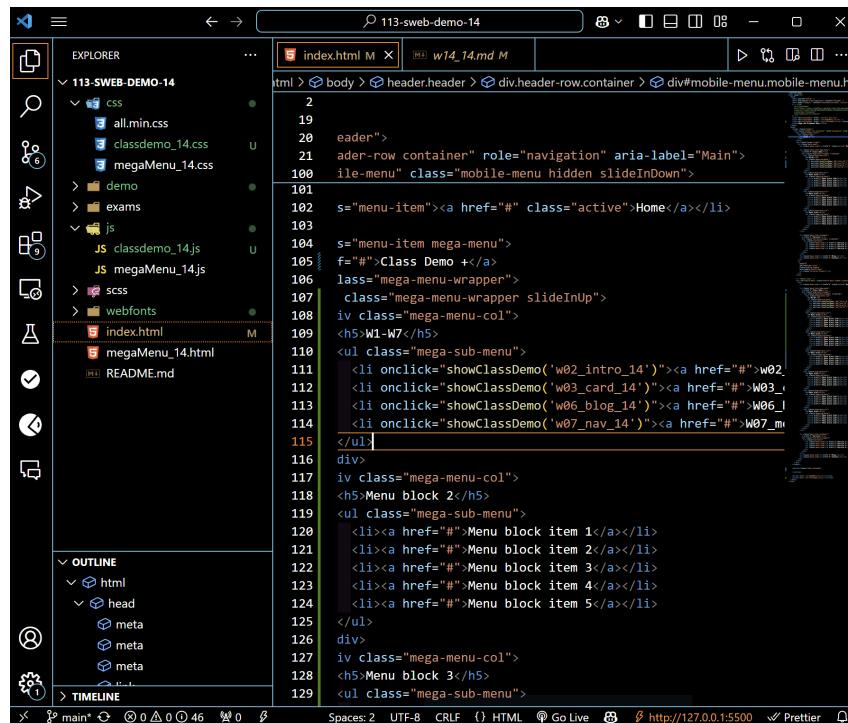

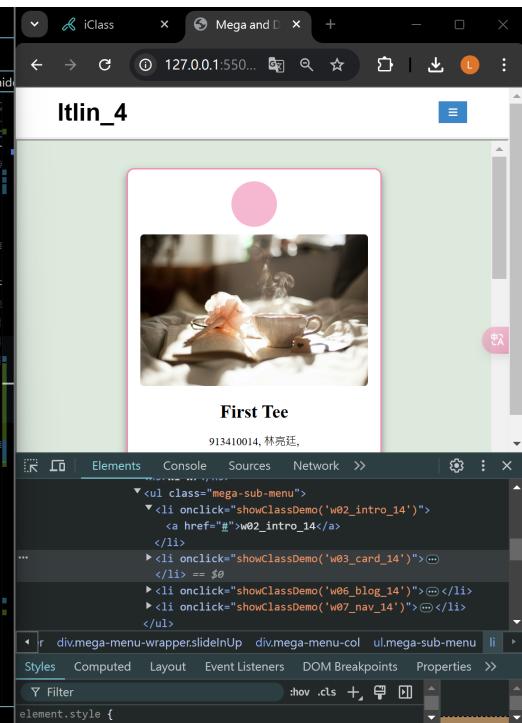

The screenshot shows the VS Code interface with the 'index.html' file open. The code includes a mega-menu structure with items like 'Home', 'Class Demo', and 'Menu block 1-5'. The browser window shows a mega menu dropdown for 'Itlin_4' with a background image of a robot arm and some text.

```

<ul>
  <li><a href="#" class="menu-item mega-menu">Class Demo +</a></li>
  <li><a href="#" class="menu-item mega-sub-menu">
    <ul>
      <li><a href="#" class="menu-item mega-sub-menu-item">Home</a></li>
      <li><a href="#" class="menu-item mega-sub-menu-item">Class Demo</a></li>
      <li><a href="#" class="menu-item mega-sub-menu-item">Menu block 1</a></li>
      <li><a href="#" class="menu-item mega-sub-menu-item">Menu block 2</a></li>
      <li><a href="#" class="menu-item mega-sub-menu-item">Menu block 3</a></li>
      <li><a href="#" class="menu-item mega-sub-menu-item">Menu block 4</a></li>
      <li><a href="#" class="menu-item mega-sub-menu-item">Menu block 5</a></li>
    </ul>
  </li>
</ul>

```

=> Show in local for w3

The screenshot shows the VS Code interface with the 'index.html' file open. The code is similar to the previous one but includes a 'mobile-menu' section. The browser window shows a mega menu dropdown for 'First Tee' with a background image of a coffee cup and some text.

```

<ul>
  <li><a href="#" class="menu-item mega-menu">Class Demo +</a></li>
  <li><a href="#" class="menu-item mega-sub-menu">
    <ul>
      <li><a href="#" class="menu-item mega-sub-menu-item">Home</a></li>
      <li><a href="#" class="menu-item mega-sub-menu-item">Class Demo</a></li>
      <li><a href="#" class="menu-item mega-sub-menu-item">Mobile menu hidden slideInDown</a></li>
      <li><a href="#" class="menu-item mega-sub-menu-item">Mobile menu slideInUp</a></li>
    </ul>
  </li>
</ul>

```

=> Show in Vercel for w6

The screenshot shows the VS Code interface with the file `index.html` open in the editor. The browser tab shows a mega menu with a dropdown menu for 'Class Demo' containing items for 'W02_intro_14', 'W03_card_14', 'W06_blog_14', and 'W07_nav_14'. The developer tools panel on the right shows the DOM structure of the mega menu.

```

    <div class="mega-menu-item"><a href="#" class="active">Home</a></li>
    <li class="menu-item mega-menu">
      <a href="#">Class Demo +</a>
      <div class="mega-menu-wrapper slideInUp">
        <div class="mega-menu-wrapper slideInUp">
          <h5>W1-W7</h5>
          <ul class="mega-sub-menu">
            <li onclick="showClassDemo('w02_intro_14')"><a href="#">W02_intro_14</a></li>
            <li onclick="showClassDemo('w03_card_14')"><a href="#">W03_card_14</a></li>
            <li onclick="showClassDemo('w06_blog_14')"><a href="#">W06_blog_14</a></li>
            <li onclick="showClassDemo('w07_nav_14')"><a href="#">W07_nav_14</a></li>
          </ul>
        </div>
        <div class="mega-menu-col">
          <h5>Menu block 2</h5>
          <ul class="mega-sub-menu">
            <li><a href="#">Menu block item 1</a></li>
          </ul>
        </div>
      </div>
    </li>
  
```

to replace index.html in the home directory

W14-P1: Setup mega menu

W14-P3: Add tictactoe multipage

=> Show in local

The screenshot shows the VS Code interface with the file `tictactoe_14.html` open in the editor. The browser tab shows a tictactoe game board with two players ('O' and 'X'). The developer tools panel on the right shows the DOM structure of the tictactoe board.

```

    <div class="header">
      <div>
        <div>
          <div>
            <div>
              <div>
                <div>
                  <div>
                    <div>
                      <div>
                        <div>
                          <div>
                            <div>
                              <div>
                                <div>
                                  <div>
                                    <div>
                                      <div>
                                        <div>
                                          <div>
                                            <div>
                                              <div>
                                                <div>
                                                  <div>
                                                    <div>
                                                      <div>
                                                        <div>
                                                          <div>
                                                            <div>
                                                              <div>
                                                                <div>
                                                                  <div>
                                                                    <div>
                                                                      <div>
                                                                        <div>
                                                                          <div>
                                                                            <div>
                                                                              <div>
                                                                                <div>
                                                                                  <div>
                                                                                    <div>
                                                                                      <div>
                                                                                        <div>
              </div>
            </div>
          </div>
        </div>
      </div>
    
```

=> Show in Vercel

The screenshot shows a side-by-side comparison of a code editor and a web browser. On the left, the VS Code interface displays the file 'tictactoe_14.html' with code related to a 'multipage' menu system. The code includes classes like 'mobile-menu', 'dropdown', and 'sub-menu'. The terminal tab shows a command-line session with 'git log' output. On the right, a browser window shows the live preview of the website at 'https://113-sweb-demo-14.vercel.app/tictactoe_14.html'. The page title is 'Itlin_14' and it lists 'ClassDemo', 'Mega menu +', and 'Multipage +' under the 'tictactoe' category. Below this are sections for 'Service 2' and 'Service 3'. The browser's developer tools are open, showing the DOM structure of the 'tictactoe_14.html' page.

W14-P4: git logs for W14

The screenshot shows the GitHub repository page for '113-sweb-demo-14'. The 'Commits' tab is selected. The main area displays two groups of commits:

- Commits on Dec 12, 2024:**
 - W14-P3: Add tictactoe multipage** by zero2005x (committed 2 minutes ago) - 1 / 1
 - W14-P2: Show class demo of w2, w3, w6 in both local and Vercel** by zero2005x (committed 1 hour ago) - 1 / 1
 - W14-P1: Setup mega menu to replace index.html in the home directory** by zero2005x (committed 1 hour ago) - 1 / 1
- Commits on Dec 5, 2024:**
 - W13-P3: Make tictactoe_14.html work using tictactoe_14.scss** by zero2005x (committed last week) - 1 / 1
 - W13-P2: Make tiles_xx.html work using tiles_xx.scss** by zero2005x (committed last week)
 - W13-P1: Create tiles_xx.html and tictactoe_xx.html with the same navbar as in index.html**
